This is regarding the fence complaint. We will not be removing the fence because our son has autism and is petrified with their dogs everytime the dogs come to the window and the fence line our son runs inside scared. They are constantly barking & they are very aggressive. We have approached all neighbours in the area about our backyard and everyone is in agreement with the work that has been done, we can provide signatures from surrounding neighbours if need be.

Also, we have caught the complainers peaking through the window where we have extended the height of the fence, more than 10 times. We feel very uncomfortable having these people watching us in our own backyard. We have surveillance cameras in our backyard that requires a few lights to be on and they have also complaint about lighting which is why we extended the height of the fence so the light does not glare in their window.

we would appreciate if you would
Consider the height of extended fence
So we could continue enjoying + feeling
Comfortable in our own backyard.

Ps: Their dogs do NOT have Tags.

Thank-you!

Remedios

To whom it may concern,

May 20/21

My name is Stephanie. I am one of the Full-time nurses that care for Melissa and Joe's son, Jackson. I work day and night shifts with the family. On more than one occasion I have had frightful interactions with the neighbour's dogs next door. The dogs are let out early in the morning (Sometimes unsupervised), and I often have to run from the front door just to get to my car safely. There have been times when I have almost tumbled down the steps due to fear of the dogs crossing the yard. They bark very aggressively, and are very intimidating. Prior to Joe installing the fence in the backyard, I would be fearful of taking Jackson outside to play. We have had to run inside many times for fear that the dogs would hop the fence and attack. They growl, bark, and cross the front yard quite a bit before the leash stops them. I'm not sure about what should be done, however, I do know some sort of action needs to be taken soon before someone is harmed by those dogs. Thank you for taking the time to read about my experiences.

Kindest regards,,

Sau.

Stephanie Adams
