Subject: Yield sign not working
Date: September 11, 2021 2:25:36 PM

Hi there. I live at the corner of queen and Munro in Cannington where there is a yield sign located. In the past month of so there has been way too many close calls where cars are almost t-boning each other because cars are failing to yield. Is it possible to change the sign to a stop sign to before there's a serious accident?
