

---

Dear Members of Council,

I am writing to request that the Township consider allocating funds during the upcoming budget deliberations for the installation of fencing at **Old Mill Gateway Park in Beaverton**, specifically **behind the volleyball court**.

At present, volleyballs frequently roll down the embankment toward the river, creating a number of safety concerns for park users. Individuals often have to chase after balls in this area, which poses risks such as:

- **Tripping and falling** on uneven ground or loose rocks
- **Foot and ankle injuries** due to the steep and rough terrain
- **Exposure to poison ivy and dense vegetation**
- **Accidental entry into the water**, particularly for children and youth

A modest barrier or section of fencing would significantly reduce these hazards and improve the safety and overall usability of the park.

Thank you for considering this request as part of the Township's budget planning process. This small addition would make a meaningful difference in ensuring that the Old Mill Gateway Park remains a safe and enjoyable space for all community members.

Sincerely,

Amy Burrows
