We are recommending a start date for our spring operation to be conducted from April 13 to June 19, 2026. We found our presence into June prevented cormorants from re-nesting along the shoreline sections we operated in.

We are recommending a one weekday shoot during the weeks of August 17 to 20, August 24 to 27 and August 31 to September 03. Shooting will not occur on Fridays during these weeks.

Timing for the fall operation is recommended to occur from September 08 to October 30, 2025.

We are advising that no shooting will occur on weekends – Saturday and Sunday, and holiday Mondays throughout the operation. We would like to maintain Fridays as possible operation days, (except for the three August dates), mainly to move birds off the Center Point in advance of the weekend – for the adjacent property owners.

Regards,

*Larry Wickett*
